More than traditional ERP

By delivering greater efficiency, a favorable ROI and a more personalized experience than traditional ERP systems, Enterprise Management helps businesses focus on what really matters. Enterprise Management offers multiple cloud deployment options and services, giving you the freedom to consume and scale the solution as your business changes.

A complete business management solution

Financial management

Automate your accounting and financial processes from journal entry to invoicing, accounts payable, accounts receivable and procurement. Reduce the complexity of managing multiple sites, business units and product lines with multi-dimensional functionality.

Take the administrative burden out of managing your budgets with collaborative workflows to effectively work with colleagues. Stay compliant no matter where you do business with multi-legislation, multi-language, and multi-currency capabilities. Manage fixed assets in accordance with developing regulations.

"We saw immediate performance increases, including a 30% reduction in productive labor and consolidation of an entire warehouse facility footprint, and annual savings of around $400,000."

Robert Turtledove, President and CEO, Empire Candles

Reporting and analytics

Generate insight with data across multiple machines and sources. Give your team personalized information with access to live dashboards customized for specific business roles to monitor performance and alert them to abnormalities in the business.

Create customizable scoreboards for individual business roles and navigate up and down the audit trail to manage risks. Distribute consistent reports across the organization, trigger alerts and workflows based on KPIs, and enable collaboration to make better decisions.

Supply chain management

Enable faster production cycles and faster response times, while efficiiently managing the supply chain. Maintain optimal stock levels and deliver on customer commitments by easily identifying dependencies between work orders and material availability.

Manage logistics, control warehouses, and track key information. Run best-in-class operations with continuous improvement programs.

"We basically restructured all our business processes to take advantage of Sage Enterprise Management's flexibility, customizability and the ability to run on-premise, or as a cloud-based solution."

Kory Keenan, IT Manager, Kobayashi

Production management

Automate your production processes and respond faster to customer demands. Improve predictability across the manufacturing process.

Maintain agile production cycles with advanced bill-of-material management, production planning, and shop floor control. Reduce costs, improve customer experiences and drive quality and performance improvements with non-compliance and non-conformance management.

"We've reduced our inventory carrying costs by 30% -that represents nearly $500,000 in cash freed up. Inventory turns are up by 20%. The time to produce a custom quote is down by 75%."

Rich Shade, Vice President and COO, S&S Hinge

Project management

Know the ROI of your various initiatives and projects. Respond faster to customer inquiries and optimize profitability with accurate project costing and pricing. Improve cost management and gain better control of project profitability. Define project schedules, forecast costs, manage timesheets and track financials. Ensure accurate tracking of all tasks and dependencies to optimize profitability and keep projects on schedule.

Consolidate multiple projects and create snapshots and financial comparisons. Report on KPIs such as sales margins, budgets and commitments.
